Other Work.

AGREED ON IN CONFERENCE. WASHINGTON, March 4.-At 2 o'clock this morning all the appropriation bills had been acted on except the general their passage not occupying much more deficiency and the agricultural. The points of difference on the latter are not material. On the general deficiency bill the main contention is the French spoliation claims. Mr. Cannon and the other house conferrees will ask further instructions from the house in opposing these claims. In the pension appropriation bill the controversy over fees was settled on a basis of compromise. The Indian bill differences were also settled. The army reorganization bill has been sent to the senate for conference.

As agreed upon in conference the agricultural appropriation bill contains the senate amendment allowing sorghum sugarmakers to use spirits free of tax, and the Stewart irriga-You can buy HOMESITES ference receded from its amendment appropriating \$20,000 for silk culture, this clause going out of the bill alto-gether. The house managers agreed to an appropriation of \$150,000 for the disand of \$45,000 for additional agricultural experiment stations.

SIGNED BY PRESIDENT HARRISON. WASHINGTON, March 4.- The presidirect tax bill; the act to prevent bookthorizing Vice-Consul-General Scudamending the law in regard to the immigration of aliens; the act grantof the hot springs, Arkansas; to provide for the inspection of live hogs and the carcasses and products thereof which are the subjects of inter-state commerce; the joint resolution appropriating \$1,000,000 for the improvement of the Mississippi river and making the same immediately available, and the act to provide for the adjudication and payment of claims arising from Indian

There is an interesting coincidence to be noted in the case of the bill which was passed Monday for the erection of a mint in Philadelphia. President Harrison signed the bill Tuesday, which is the 100th anniversary of the day on which President Washington signed the bill originally establishing the mint at Philadelphia.

WASHINGTON, March 4.—It is the gossip at the capitol that the president, in discussing the congressional outlook, said that there did not appear to be any necessity for an extra session of congress, and that he has no intention of calling the senate together, as there is nothing requiring its attention.

WASHINGTON, March 4.-In the senate after the reading of the journal the Half an hour afterward the doors were reopened and the general deficiency bill taken up. All the amendments that had been agreed to in committee of the whole Monday night were agreed to in bulk, except as to four that were reserved, including the French spoliation claims and the Pacific railroad claims. An amendment by Senator Plumb (Kan.) appropriating \$50,000 for the relief of the citizens of Oklahoma who have been rendered destit to by the drought of the past season, was agreed to. The reserved amendmentage as to payment of Pacific and obtains and the Franchise a railroad claims and the French spoliation claims were agreed to.

Senator Stewart (Nev.) offered an amendment to reimburse to the states of California, Oregon and Nevada moneys expended by them in the sup-pression of the rebellion—\$2,451,369 for California, \$224,526 for Oregon and \$404,-

040 for Nevada. Agreed to. Senator Daniel (Va.) moved to insert a paragraph directing the secretary of the treasury to resettle and pay the claims of the states of New York, Pennsylvania. Delaware, Virginia and South Carolina and the city of Baltimore on account of advances made in the war of 1812, and appropriating \$2, 500,000 for that purpose. Agreed to.
This finished the senate's action on the general deficiency bill, and it was amendments. The conference report on the diplomatic appropriation bill, including the provision for the Hawaiience report on the diplomatic and consular appropriation bill was presented and agreed to. On the pensions appropriation bill the conferrees reported that no agreement had been reached. The senate refused to recede from its position and a further conference was asked. The conference report on the sundry civil appropriation

bill was taken up and agreed to. The conference report on the copyright bill was presented, explained by Senator Platt (Conn.), and agreed to. There were two points, however, on which no agreement had been reached -the Sherman amendment allowing the importation (on payment of tariff duties) of foreign copies of copyright books and the Ingalls amendment allowing the importation of newspapers and magazines. Being satisfied that no copyright bill could become a law with these two amendments, Senator Platt moved that the senate recede from them. A lengthy discussion followed. A division of Senator Platt's motion having been called for the question was taken, first on the motion to recede from the Sherman amendment. The motion was defeated-yeas, 28; nays, 33. So the Sherman amendment was insisted on. The same course was taken with the Ingalls amendment without a division and a further con-

ference was ordered. The senate then proceeded to the consideration of house pension bills on the

Morrell, Alfred L. Pearson, William B. Franklin, John C. Black, George W. Steele, James Barnett, J. H. Bonebrake and Francis Fessenden. The report gave rise to some discussion, and pending action the conference report on the legislative bill was presented. A resolution was adopted directing the house conferrees not to agree to the senate amendment appropriating \$20,000 to enable the secretary of agriculture to collect and publish information as to the best methods of irrigating the region between the 97th degree of longitude and the eastern foothills of the Rocky mountain. The senate amendments to the deficiency bill were non-concurred in and a conference was asked for. A further conference was ordered on the pension appropriation bill. The con-ference report on the sundry civil bill

was agreed to. Mr. Hitt (Ill.) submitted the conference report on the diplomatic and consular appropriation bill. Mr. Hitt stated that the only subject which had been in dispute was the senate amendment relative to the Hawaiian island cable. The proposition as it now stood reduced the cost from \$3,000,000 to \$2,250,000 and provided that the government of the Hawaiian \$30,000,000 required on that account islands should pay one-third as for the quarter ending to-day. cable provision. Agreed to.
A recess was taken until 8 p. m. In spite of the inclemency of the weather the galleries of the house were packed to their utmost capacity when that body met after the recess, and hundreds of persons unable to obtain ingress surged through the corridors. The conference report on the post office appropriation bill was agreed to. Mr. Funston (Kan.) submitted a disagreeing report on the agricultural appropriation bill and a further conference was ordered. The conference report on the pension appropriation bill was agreed to. Mr. J. S. Taylor (O.) moved to suspend the rules and pass the bill to provide for a commission of five persons on the subject of the alcoholic liquor traffic. The motion was declared carried by 60 to 54.

The conference report on the Indian appropriation bill was agreed to. The senate amendments to the army reorganization bill were non-concurred in and a conference was ordered. Mr. Simonds (Conn.) submitted the conference on the copyright bill. The house agreed to the conference report and the bill now goes to the president

RECIPROCITY WORRIES ENG-

According to European dispatches. there is much exci ement in the English manufacturing districts over the treaty between Brezil end the United States and the Manchester Chamber of Com- thorizing the speaker of the house to merce will held a special meeting to con- appoint five representatives and the Porter, for the seat in the provincial eider the matier. At a preliminary gath- president of the senate four senators to parliament rendered vacant by the unering it was urged that steps should be represent Illinois at the congress. Bills taken to enable England to enjoy the same advantages as the United States. It follows that the 25 per for the appointment of a commission to cent conceded to the United States is practically 371/2 per cent on the first cost in favor of American goods. By a farther fall in the rate of exchange, which is by no means improbable, this might be raised to 50 per cent.

At the present rate of exchange, about 19 pence, American goods have the following advantages over English: Printed cottons, 10 shil ings per lump 100 yards, on Oxfords, ginghams, regattas, etc., 1 penny per yard, and on blesched cotton, 2 shillings 9 pence per four yards. Every fell in exchange would increase this advantage. English industry cannot possibly compete against such cdd, and Braz lian exports would soon show very d fferent returns from those returned at present. The London correspondent of the New York Herald says: "It is certain that Sir Titus Balt the Manchester manufacturer, will soon make plush in the United States. The English trade has teen stagnant since the McKinley bill pased and there has been much distress among the operatives. The Mesers. Hinds, who are manufacturing in Utica, New York, bave stopped making plush. The Bradford mills and other makers have reduced their output." ABOUT JANESVILLE INSUR-

The Panther Wouldn't Let Him Sleep. Deputy marshals who work in the Indian country lead a hard life. Accommodations are not always to be had. Tom Smith told a reporter of an adventure he had.

Night overtook him near an old cabin, but as the Indian custom of burying the dead in their houses and then moving away fashed upon him he decided to sleep under a tree some little distance, and thus avoid a possible interview with an aboriginal spook. In the night a rain set in, and he got up and went in the cabin, and shut the door to keep out he rain and water. He wrapped his blanket around him and lay down. > After Blowing Out the Gas the Suspiciou Lodger Ties His Hoslery Around The Burner to 'Keep Out the Peculiar Smell."

Janesville's recent experience with hotel guests who blow out the gas has set hotel clerks to talking.

"I had an experience with a man who blaw out the gas," said Richard Hawley, cierk at the Park House, "that came very near sending the fellow into eternity. It was several years ago while I was night clerk at the Myers House. A young fellow who came here to attend Valentine's school, came to the house one evening and wanted a room. I gave him one, and he went to bed at 9.30 o'clock. "About 11 o'clock Dr. D. Robinson the Irish doctor,' came in and went to Fully twenty minutes elapsed after the

"Yes, I can, said he, come up at smell for yourself.' I did so and traced the cdor to the young fellow's room, We could not get in, and finally broke the door open. The gas came out in a stream and nearly choked us. We finally got the young man of bed, and opening the window at the top and bottom. hanging the man over the window sill, with his head outside. When the room was aired out a little, I started to light the gas. May-be you won't believe what I tell you, but that man had hung one sock over the burner and wound the other about it tightly, and tied the whole business tight with a string the way a man would bandage up a sore fluger, When he came to, he said that he had blown out the gas and tied the sock around the barner to keep out the smell."

"They talk about bresking doors in with axes," said Frank Stevens, clerk at the Grand, "but it isn't as easy as you would suppose. When a man blew out the gas in a hotel where I was clerk once I tried to break in the door with an ax. I simply couldn's do it, though, without breaking the door all to pieces, and waking everybody in the house. We tried prying the door open, but that would not work. Finally myself and two other men jumped at the door all at once and it went open with a crash. The lock and bolt flew clear across the room. When we charged the the man three dellars for the door and his lodging a day and a night he kicked. He kicked too on paying the doctor who brought him around because the doctor blistered his feet. Facts That Mean Much For Roc EDITOR GAZETTE:-The question so often asked "What must we do in order to realize more remunerative prices for farm product?" can be easily answered by directing our thoughts to certain well established rules of trade. In the first place there is always a demand for a good article: second-the nearer an artible is ready for active use, the more value is attached to it. The tobacco growers must remember that a large acreage of poor tobacco means farming at a loss. We must improve land to the highest possible standard in order to reap rich results. The farmer who increates his coreage, and diminishes the quantity of manure on f is land, will eventually find an empty bank account. The quantity, quality and price of tobacco is largely guaged by the quality of the soil, manure and care in handling the crop. The farmer must not be content with getting his tobacco in It is no more ready the market than that has never been helter-broke. It is only in proper shape for development, and there is the rub. Tobacco is not raw material. The farmer who raises it and pays some eastern gentleman to take it off his hands and develop it, is the only raw material in the case. The land on which it grows is a manufacturing estabishment. Take out your pencil and figare the cost of ranning this establishment; taxes, incidentals, manure, labor, casualties. Please remember that when you are informed that tobacco can be day. raised for \$50 per acre that you have left your wife's labor out of account. You do not take into consideration how many other families your wife is cooking for-now many other people enjoy fashionable summer rescris, while you are sweating to raise another crop to sweat profit in the store house to enrich a non-producer while

you pay seventy per cent of the taxes to continue this government. There is a world of thought in connection with these problems. Shall we draw the trade here or shall we ever say it might have-been? It is the history of all sections of country where the products are disposed of in a crude state that failure or partial success is recorded. It is the developing of the resources of a country that makes it great and gives been engaged in the clothing business all it prominence. The general distribution his life. MISS MATHER AS "LEAH."

Crowded House Greets Her Appearance In Her New Role. " No more seats in the balcony and only a desen down stairs," was Hiram Mardock's explanation to late ticket buyers at the Myers last night. Margare Mother has been a favorite in Janesville from her first appearance, and when the curtain rose on "Lesh the Forssken." she looked out on an audience of nearly a thousand. It was a critical audience. It was a cultured audience, and needless to say it was an appreciative audience. The play of "Leah" gains its interest from the love of a Jewish maiden for a Christian youth broken into by the cry of the religious fanatio Nathan, the apostate. The picture of a loving maiden whose to be present. whole heart is wrapped up in a man who through religious restrictions is held down and thrown apart, are never brought out more strongly than in th part of "Leab," and Miss Mather plays no part in her repertory with more strength, than this. In the celebrated curse scene, which ends with the of!quoted expression, "An eye for an eye, a tooth for a tooth, a heart for a heart," she won round after round of applause. ed by Evansville papers a few days ago | Many had regretted that Miss Mather as declaring that the state board was to did not again give "Juliet," and many blame for the condition of the Rock still feel that she would have been more county insade as lum.
